

CHAPTER 2

Server Administrator MIB Group

The server administrator Management Information Base (MIB) Group defines the attributes that identify the major and minor version numbers of a MIB file.

The `mIBMajorVersionNumber` and the `mIBMinorVersion` number are scalar objects, meaning that they are not related to other MIB objects and are thus not placed in a table.

MIB Major Version Number

Name	<code>mIBMajorVersionNumber</code>
Object ID	1.3.6.1.4.1.674.10892.1.1.1.0
Description	<p>Provides the major version number of the Enterprise Server Group MIB, for example, 10892.mib, version 1.0.</p> <p>A major version number change indicates a major change in object functionality.</p>
Syntax	<code>DellUnsigned8BitRange</code>
Access	Read-only

MIB Minor Version Number

Name	mIBMinorVersionNumber
Object ID	1.3.6.1.4.1.674.10892.1.1.2.0
Description	<p>Provides the minor version number of the Enterprise Server Group MIB, for example, 10892.mib, version 1.1.</p> <p>A minor revision provides additional support for new objects as well as problem fixes.</p>
Syntax	DellUnsigned8BitRange
Access	Read-only
